

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office  
FLOOR DEBATE

February 6, 2004 LB 227

that are on the floor right now.

SENATOR CHAMBERS: And you made that clear. That's all that I will ask you at this point, because my intent is to burn off time, but in the process, I want the public who may be watching us to understand what it is this Legislature is being asked to do. This Legislature is being asked to create two categories of young people for the purpose of protecting their safety. We have first-class children, second-class children. I know something, being black, about second-class citizenship and it is not good. It is not a nice or comfortable position to be in. And when you look around and see how first-class people are treated, it makes you very bitter. And when adults see their children treated as second-class children, it makes those parents bitter also. There may be parents who are not mindful of the safety of their children, or may not be aware that their children are doing the kind of work that will jeopardize not just their safety but their very life, and that the law does not give them any protection. I believe there are safety requirements that OSHA may have in place...

SENATOR CUDABACK: One minute.

SENATOR CHAMBERS: ...for people who work in packinghouses, for people who work on construction. I don't believe that OSHA will say if a person is digging a hole in the ground and is wearing bib overalls and cowboy boots these safety requirements need not apply. But if a person is digging a trench right next to that trench and is wearing city slicker construction clothes, then these safety requirements apply. We cannot, or I will not, allow the creation of second-class children. Thank you, Mr. President.

SENATOR CUDABACK: Thank you, Senator Chambers. You heard the opening on FA1443 to the Quandahl amendment, AM2236, to LB 227. Open for discussion. Senator Aguilar.

SENATOR AGUILAR: Thank you, Mr. President and members. I just want to start off and reiterate that I do oppose these amendments. I don't think it's important how fast your vehicle is traveling because it's the other guy that causes the problem
